GAMIFICATION AT PUBLIC TRANSPORT

Motivate people to use Public Transport

Application that gathers distance covered from a citizen by using public transport.

Kilometers/miles are reflected to points and added into user's profile point system. Points are translated to real awards.

- Calculates distance covered by using public transport and gathers 'Smiles' 😊 based on the distance
- Grants rewards based on points (Smiles) obtained
- Calculates CO2 emission based on user's car

Who can use it?

- All citizens (as users)
- Public Transport services (as vendors)
- Municipality (as providers of real awards)

Impact and Business Model

Environment

Decrease Car Emission

A full bus can take 50 cars off the road

Use Green Buses

- 👍 Incentives can be provided by municipalities or by cities
- 👍 Citizens would get benefits from buying the app
- 👍 Free ads for municipalities

Energy Saving

Carbon footprint

Reduce gas consumption

Transport

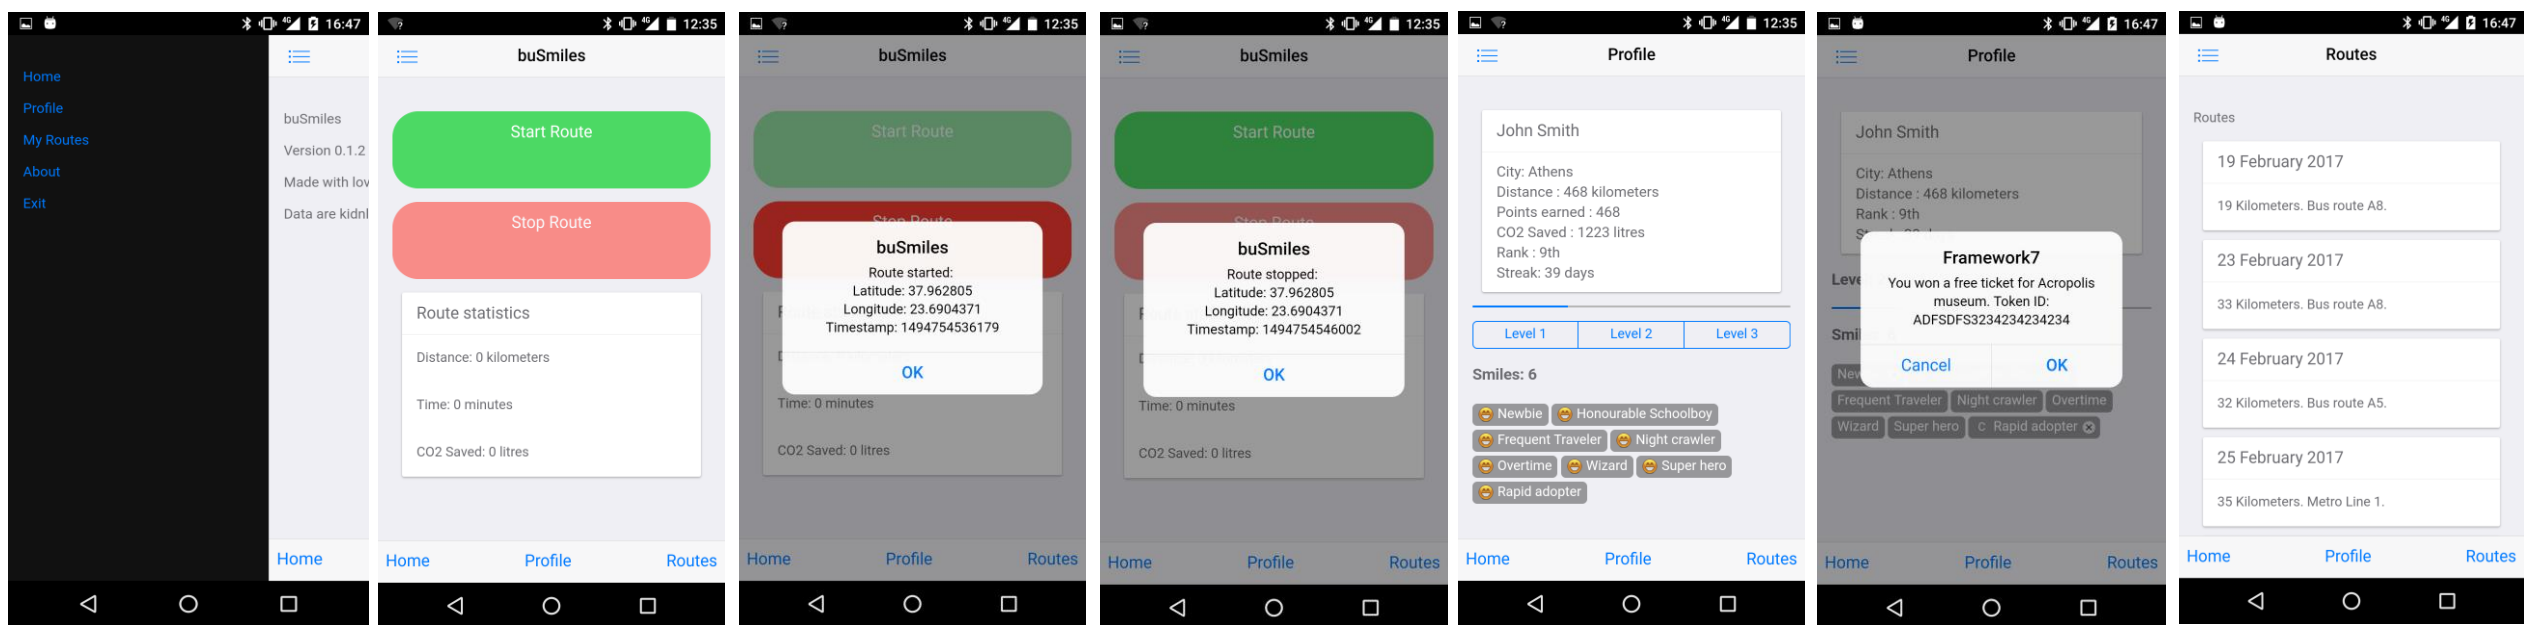

Increase profits to public transports

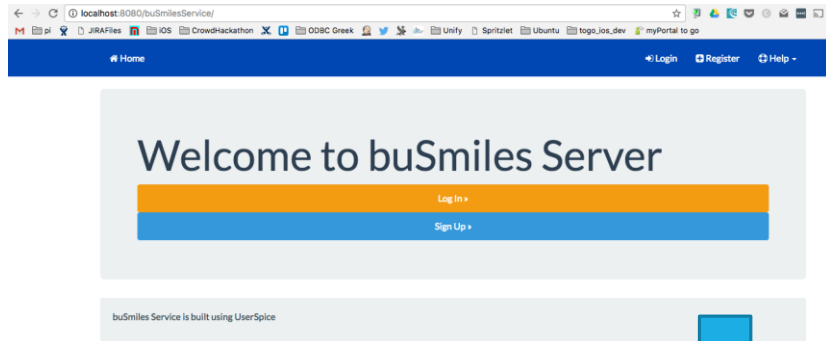

More citizens use them – More frequent and quality services

Architecture / Innovation

Android App

Server side

A screenshot of the 'Admin Panels' interface. The top navigation bar includes 'Home', 'Admin', and a settings icon. The main content area is divided into two sections: 'Admin Panels' and 'Info Panels'.

Admin Panels

Users	Active Users	Routes Covered	Litres of gas saved
3	2	36	92353
Manage	Manage	Manage	Manage

Info Panels
